Important to Consumptives.

DR. CHURCHILL'S DISCOVERY. Winchester's Genuine Preparation of Dr. J. E. Churchill's Compound of the

HYPOPHOSPHITES LIME. SODA AND POTASH, As Discovered and Prescribed by him as a Specific for CONSUMPTION.

THIS GREAT REMEDY IS A DISCOVery of Chemical Science, founded upon the Hy-thesis that the proximate cause of Consumption is the potnesss that the proximate cause of Consumption is the deficiency or undue waste of the oxydizable phosphorus rmally existing in the economy; and that, therefore, the ecific Remedy for the disease, consists in restoring the deficient element by the use of such a preparation of Phosphorus as unites the two conditions of being in a state that it may be directly assimilated, and, at the same time, at the lowest degree of oxydation. The HYPOPHOSPHITES OF LIME, SODA

AND POTASH phorus itself.

The Hypophosphi'es axert an important influence directly on the nervous system, of a tonic character, increasing the principle which constitutes nervous force, and are the most powerful blood-generating agents known. They are, therefore, invaluable in all forms of Nervous or General Debility, Asthma, Bronchitis, Dyspepsia and Loss of Vital Energy from whatever cause. Ladies suffering from Complaints peculiar to their sex, will find this remely act with charming effect, from its vital zing and renovating power.

Caution to the Public. V. rivus preparations are already in the market, purporting to be based on Dr. Churchill's discovery, against which we solemnly cautien both the profe-sion and the public. No arts will be spared by unscrupulous and dishonest persons to impose upon the unwary.

If Beware of them all, if you would not be poisoned by deleterious suff. Read the following: Testimony of Dr. Chilton

"I have carefully analyzed samples of the Hypophos phites of Lime, Soda and Potash, from which Mr. J. Winchester manufactures Dr. Churchill's Compound Solution of the Hypophosphites, and find them to be properly made and perfectly pure. Having had many opportunities of the theorem which have been made and perfectly pure. rm purity of the article which he use testing the uniform purity of the article which he uses in compounding this new remedy for Consumption, and having a personal knowledge of his honesty and integrity, I feel that I can assure the profession and the public, that this preparation of the Hypophosphites can be relied out.

JAMES R. CHILTON, M. D., Chemist.

"New York. February 8, 1859."

In addition to this unimpeachable evidence, I call the attention of the public to the more important and conclusive:

Testimony of Br. Churchill, "To be used with effect, the Hypophosphites must be perfectly pure; otherwise they may, in some cases, appear altogether inert, or even injurious. In five cases out of six, the salts usually sold as pure in Paris, under the name of Hypophosphites, are totally unfit for medical use.

Dr. Churchill's WORK ON CONSUMPTION Has been received from Paris and will be published all possible dispatch.

Has been received from Parts and will be permissed all possible dispatch.

I have also an original leater from Dr. Churchill, in exposition of his discovery, which, with circular, and other valuable information, will be sent to all sufferers throughout the Union, whose names may be forwarded to me. I have permission to refer to many gentlemen of high standing in this city—among others, to Horace Greeley, Esq., editor of the New York Tribune, who has known me intimately for the last twenty-six years; also, Hon. No appropriation pass d for continuing building of the Capital, furnishing it or continuing the Water Works, the House refusing to concur and the Senate receding.

The President did not sign the St. Clair Flats bill.

The President has not, as yet, determined whether he will call an extra session or not. He says he will wait and consult with the Postmaster General, who is now ill, and if that officer considers he can not carry on his Department, he will convene Congress as soon as possible, probably in June.

June.

The Treasury Department has given orders to shorten sail on all sides, and expenditures will be cut down to the every effort will be made to avoid an extra session. It is considered probable that the bankrupty of so important a portion of the public service as the Postoffice Department, and the total neglect by Congress, of the important recommendations regarding our foreign relations, on the Mexican frontiers, &c., may induce the President to call the new Congress together.

A majority of the committee doubt very much the policy of the abolition of said office, even if the question, were an open one; but the action of the House has already precladed the necessity of further legislation on this subject.

Firstly. The House as part of the late joint convention, elected an officer as State Printer under the law now existing.

Secondly. The House has passed a bill regulating the prices and business of such office—all this action has been void and nugatory under the proposition of the bill to abolish an office, the necessity and propriety of which has been thus repeatedly recognized by the General Assembly during the present session. Your committee, therefore, recommendations regarding our foreign relations, only the Mexican propries to all the new Congress together.

It is understood there will be a deficiency in the Post-last longer than to-morrow.

It is understood there will be a deficiency in the Post-last longer than to-morrow.

A rumor prevails that the Army bill was not signed by the resident to all the new Congress together.

A great effort has been made at the close of the session to have an unexpected balance of \$71.500 remaining of the assissippl, applied by the direct action of the Secretary of War to the purpose.

The plan of the contractors has failed, and there are fifty thips detained at the Balize, some of which have been there since December. A Cabinet Council was called immediately after the close of Congress, to take into con-ideration the refusal to pass the Post-office Appropriation bill, which was lost on a point of ctiquette between the Fenate and the House.

There will be no means for carrying on the Post-office business except such as accrues from postages, and these can only be paid out by Postmasters, for salaries, &c., such as is the usage for each Postmaster to pay and account for in his regular accounts to the Department.

Contract rs, route agents, &c., must wait for their pay. No new routes can be opened nor new contracts made for the conveyance of meils over existing routes.

position in all this matter, and every effort will be made to save the great working routes from embarrassment.

Thirteen States, sending seventy-eight Representatives, nearly all Democratic, have yet to make Congressional elections. Several of these do not elect until after August and some have no provisions to obtain an earlier election.

James Y. McGuffin of Georgia, is appointed Superintendent of Indian Affairs in California, and G. W. Ghalson, of Mississippi, Governor of Washington Territory.

A serious affray occurred in the office at Willard's Hotel, last evening, between T. P. Lander and William Magraw. The latter was appointed a year ago, Superintendent of the great Central Wagon Road, and the former was engineer of the expedition.

Recently Magraw has been removed, and Lander ap-pointed Superintendent of the Road.

Owing to some personal difficulty between them Lander Magraw, but the affair was settled without a fight To-night Magraw attacked Lander with a slung shot, and struck him several times, wounding him severely about the head. Lander rallied and threw Magraw, and would have punished him severely, if not fatally, had he not been taken off, when he exclaimed: "I am a Massachusetts man, and unsumed. I have challenged the scoundrel and he refused to fight me, and now he assails me thus with a slung shot." This exclamation soon enlisted the sympathies of the by-standers for Lander.

Magraw wastaken away by his friends, and Lander was conveved to his lodgings badly wounded. The latter becomes the control of the To-night Magraw attacked Lander with a slung sho

There is now no doubt that there will be a session of Congress called by the President earlier than the first Monday of December next, but whether in advance of er directly after the antumn election for Representatives, is not yet determined. Not only the Postoffice Department, but other branches of the publice service absolutely require legislation before the usual time of the meeting of Con-

gress.

The Senate in executive se sion confirmed the nomination of A. N. Zevily, formerly of North Carolina, and for a long time a clerk in the Postoffice Department, as Third Assistant Postmastar General, in place of Morrow, deceased; also the appointment of Robert Ould, as United States Attorney, for the District of Columbia, vice Key deceased. It has erroneously been stated that Senator Pearce,

Maryland, denounced the report of the committee of conference on the Postoffice / ppropriation bill, who was member of the committee and signed the report, althoughe yielded to it with great reluctance, preferring the passage of the bill to its defen o its defeat. Quick Cures.—Until the introduction of the R. R. R. remedies in 1849, no remedy ever claimed the marvellous power to relieve pain instantly, or even to promise a cure of any disease in a given time Radway's Ready Relief, during the month of July, cured Mr. James Roberts, James street, New York, of a Chronic Rheumatism in twelve hours. It relieved him from pain in ten minutes. Mr. Schemerhorn, of Brooklyn, a cripple, was enabled to walk without his crutches in fifteen minutes after the cork was drawn from the bottle. Colonel Jones, of Oak Mullaga, Virginia, a sufferer for many months, was so relieved that all pain was removed from both legs by the time the second leg had been rubbed some ten minutes, walked home. An old gentleman liv ng on the Colonel's plantation, was cured of a stiff knee in five minutes. Thousands of dysentery and diarrhe were cured in fifteen or twenty minutes at the furthest There is no necessity for lingering in pain. The R. R. R. emedies are destined to revolutionize the whole medical world. People demand to be instantly relieved from pain and be quickly restored to health, and if physicians expec to be successful, they must examine into the R. R. CERTIFICATE OF DR HAYS.

It is well known that the medicinal effect of Protoxide of Iron is lost by even a very brief exposure to air, and that tomaintain a solution of Protoxide of Iron, without further oxidation, has been deemed impossible.

In the Peruvian Strup this desirable point is attained by COMBINATION IN A WAY BEFORE UNENO WN; and this solution may replace all the proto carbonaces, cirates, and tartrates of the Materia Medica.

Mammoth Lath Machine, Patented Janu ry 15, 1856 for the following reasons:

1st. The position in which the belt is placed into the Machine being at an angle o forty-five degress, which obviates the necessity of changing anything for different lengths and thick esses of the bolt

2d. The arrangement of the rests for governing the thickness of the Lath by which they tray-if a ter than the knife, so that every Lath drops perfectly 'ree before the return of the rests. which prevents anything from catching, and every Lath is bound to be perfect and of even thickness. (This is the cause of a great waste of timber with the Mammoth Machine by catching and cutting a great many imperfect Lath, not hat I am disposed to underrate the Mammoth, for I know it is a very good Machine, but being the Inventor and baving trayers experience in manufacturing and operating them, it has enabled me to present to the public a Machine far superior to the Mammoth or any other machine.

3d. The knife has a downward and drawine stroke, so that the power required to operate it is less than one half of that of the Mammoth and can be operated by hand with ease, which is impossible with the Mammoth or any other machine.

4th. The cost is much less, which is a decided advantage to purchasers of machines or territory
